Canadian actress Ali Liebert may have grown up in the quiet Cowichan Valley but she's got a busy couple of months coming up after recently being cast in two upcoming feature films.

Look for her with funny man Will Sasso in Sook-Yin Lee's feature film *Year of the Carnivore*, as well as in the upcoming Cuba Gooding Jr. feature *Hardwired*, also starring Val Kilmer.

If TV's your bag, Liebert can also be seen on the small screen in her recurring role of 21 year old science geek, Jackie, on the ABC Family hit series *Kyle XY*.

Ali's other television credits include roles on *Dead Like Me*, *The L Word*, *Psych*, *The 4400*, *Whistler*, *Fallen*, *Blood Ties* and recurring roles on *Intelligence* and *Young Blades*.

She will also be a part of a strong ensemble cast in the new hour long CBS/Paramount drama *Harper's Island*.

It has been a whirlwind year for Ali, who recently wrapped the quirky feature film *The Break-Up Artist*, with Amanda Crew. Her other film credits include the Movie of the Week *All She Wants for Christmas* and *The Secret Lives of Second Wives* (with Andrea Roth).

Ali Liebert is a talented young actress who has quickly become one of Canada's biggest rising stars.

Raised in Duncan, she had a keen interest in performing from an early age. She saw Donny Osmond in *Joseph and the Amazing Technicolor Dreamcoat* at age 10 and knew then the stage was where she was meant to be.
